

Foaming Hand Wash

Afresh® Foaming Hand Wash & Dispensers are convenient and help assure compliance with CDC Hand Washing Guidelines. Compliance is easy...have Afresh Foaming Hand Soap available in easy-to-use dispensers at every wash station and in every resident bathroom.

Our Afresh Dispensers are ADA compliant, requiring less than 5 lbs of pressure to dispense. The dispenser design makes one-handed use easy. The push pad is at the top, so the user can “see” the foaming soap, reducing waste caused by over-dispensing. Top dispensing also helps prevent spillage on the wall below the dispenser. (Bottom-Dispensing Units also available if needed.) A view window makes checking the product level easy & fast.

Afresh Foaming Hand Wash is available in 3 versions, all packaged in 1000 ml refills that fit in the Afresh Wall Dispensers. ADA Hallway Compliant adapters are also available.

Product Information

Afresh Foaming Hand Wash:

More efficient than liquid hand wash products...for resident & public bathrooms and employee use as well. Light tropical scent/Cranberry color. ADA Hallway Compliant Push-Pads available for retrofit where needed.

Afresh Clear Foaming Hand Wash:

Dye & fragrance free...for people that have sensitivity problems. Same efficient foaming action.

Afresh Antimicrobial Hand Wash:

Uses Benzalkonium Chloride (BZK) which has excellent antimicrobial action with minimal risk of skin sensitization. Mild Spice scent/Amber color.

45200	Afresh Antimicrobial Foaming Hand Wash, 1000 ml	6

Dispensers listing available upon request

Afresh Antimicrobial Hand Wash meets the very latest FDA standards. Foaming Hand Wash has become the industry standard because it is more efficient. Simply wet your hands and dispense...no rubbing to create suds. CDC Guidelines say that employees should wash hands when reporting for work, when returning to work after breaks, and before and after every resident contact. We also have Hand Sanitizers...please contact us for information.
