

• Touchless Dispenser

• Push Dispenser

Array® Hand Sanitizers are available in two convenient packages...providing instant hand sanitizing. We have a conventional pocket-size bottle of gel (72% alcohol), and two foaming sanitizers, one with 72% alcohol and one with a non-alcohol formula. Both kill 99.99% of common harmful germs.

Both push dispensers & touchless are available. Our Array Dispensers are ADA compliant, requiring less than 5 pounds of pressure to dispense...and one-handed use is easy.

The push pad and dispensing nozzle are at the top, so you can "see" the foaming sanitizer, reducing waste caused by over-dispensing. Top dispensing also helps prevent drips on the wall below the dispenser.

A dispenser window makes checking the product fill level easy & fast. ADA Hallway Compliant adapters can be used where needed.

## Product Description

### **Array Instant Hand Sanitizer Gel (72% Alcohol):**

The familiar gel sanitizer in a convenient pocket size (4 oz). Economical, effective way to make sanitizing available whenever needed.

### **Array Foaming 72% Alcohol Hand Sanitizer:**

In convenient 1000 ml dispenser refills. Foam is easy to use and quick to dry.

### **Array Foaming Non-Alcohol Hand Sanitizer:**

No alcohol in this foaming sanitizer. Easy to use and won't sting.

*Dispensers listing available upon request*

## Information

The CDC mandates hand washing or hand sanitizing between every patient contact. The Array Foaming Hand Sanitizer, with either 72% Alcohol or non-Alcohol formula refills, can be conveniently located, meet ADA standards, and don't require a sink for rinsing. The Array Sanitizer Gel is packed in a convenient 4 oz. bottle that fits easily in your pocket or on a cart. The Array System is a sensible approach to the requirements for frequent hand sanitizing.
